

## KeraLite® Black Reflections

Where flame meets reflection.

Enhance the visual impact of the fire with this **opaque, reflective glass-ceramic**. Used on the **back wall of the fireplace**, it reflects the flame to reveal the full depth of the fire. It may also be applied as a **stove covering**, on the sides or top, with an opening for the flue pipe.

### Characteristics

- Flat, cut-to-size parts only
- Thickness 4 mm

700°C (1292° F) in continuous use and easier to clean than most regular inside wall materials

Homogeneous color

Gas application only (no wood, no pellets)
