

KeraLite® with Mirror Coating

Reflective Elegance, Even at Rest.

Discover our **patented glass-ceramic solution** that transforms the stove door into an **elegant decorative element** when the fire is not in use.

- Silver mirror-like decorative finish across the entire surface when the fireplace or stove is not in use
- Clear, unobstructed view of the flames when the fire is on
- Mirror coating provides approximately **50% reflection** in the visible spectrum (maximum temperature: 550°C / 1022°F)

When cleaning, do not use strong alkalis, acids, fluoride-based detergents, abrasive cleaning tools, or solvents for cleaning
